

ALEJANDRA GARCÍA PRECIADO

Junior Software Developer

City, Mexico — Open to Remote | alegarpre@gmail.com | +52 644 161 1271 | linkedin.com/in/alejandra404/

PROFESSIONAL SUMMARY

Software developer with 2+ years of hands-on experience building and maintaining client-facing web applications end-to-end, from requirements through deployment. Proficient in React.js, Python/FastAPI, and Firebase, with additional experience in mobile development (Kotlin, Jetpack Compose) and embedded systems. Currently completing a B.S. in Software Engineering at ITSON (GPA 9.4/10, expected May 2027) while working professionally as a developer; seeking remote software development opportunities.

EXPERIENCE

AW IT

January 2024 – Present

Junior Web Developer · Ciudad Obregón / Hybrid

- Designed and developed 6+ client-facing websites end-to-end, from requirements gathering through deployment, using React.js, HTML5, and Firebase.
- Provided ongoing technical support and troubleshooting for deployed websites and applications, resolving client-reported issues and maintaining site reliability.
- Built asynchronous, event-driven features for internal financial software using Python and FastAPI, leveraging RabbitMQ, Kafka, and Arq for background task processing, Redis for caching, and PostgreSQL LISTEN/NOTIFY for real-time data updates.
- Developed the platform's frontend using React and Redux for state management, with the CoreUI component library.

PROJECTS

Morelos 508 — Real Estate Presale Landing Page

June 2025 – August 2025

React.js, HTML5, CSS3, JavaScript

- Built a responsive, mobile-first marketing website from scratch for a local construction company's luxury residential development, showcasing property models to drive pre-sale interest.
- Implemented a lead-capture contact form to convert site visitors into sales inquiries for the development team.

Seguros Encinas — Insurance Brokerage Website

August 2026 – Present

React.js, HTML5, CSS3, JavaScript

- Built a website from scratch for an insurance brokerage, organizing 8+ product lines — including auto, marine and land transport, medical, life, retirement, residential, commercial, and travel insurance — into a clear, navigable structure.
- Designed clear calls-to-action and a dedicated contact section to drive quote requests and inquiries across all product lines.

EDUCATION

Instituto Tecnológico de Sonora (ITSON)

Expected May 2027

Licenciatura en Ingeniería en Software | GPA: 9.4/10

- Relevant Coursework: Data Structures, Databases, Distributed Systems, Web & Mobile Development, Software Testing.
- Key Project: Designed and built an ECG (electrocardiogram) monitoring system for an embedded systems course — implemented signal acquisition, non-blocking timing, and an OLED display interface on an ESP32-S3 (Arduino/C++), paired with a Python (pyserial) application for real-time serial data monitoring.

SKILLS

Programming Languages: Python, JavaScript, Java, Kotlin

Frameworks & Libraries: React.js, Redux, CoreUI, FastAPI, Jetpack Compose, HTML5, CSS3

Databases: PostgreSQL, MySQL

Messaging & Caching: RabbitMQ, Kafka, Redis, Arq

Tools & Platforms: Firebase, Git, Linux, Android Studio, Docker

LANGUAGES

Spanish: Native

English: Professional Working Proficiency (B2/C1)
